

REMARKS

In the Specification, the paragraph which begins on page 29, line 30 and continues through page 31, line 23, has been amended to duplicate the amendments entered in the Examiner's Amendment of April 6, 2005, for Claim 19. This amendment adds no new matter to the specification. Applicants note that replacing "tetrakis(2,4-dimethyl)borate" with tetrakis(2,4-dimethylphenyl)borate, and replacing "tetrakis(2,4-dimethyl)aluminate" with tetrakis(2,4-dimethylphenyl)aluminate clearly constitute revisions of a typographic or clerical nature, as the proper nomenclature for these anions appears in the specification at page 30, line 6 and page 31, line 2, respectively. Further, the proper nomenclature for these anions also appears in U.S. Patent No. 5,576,259 at column 5, lines 9 and 50, respectively, which is incorporated by reference in the present application at page 29, lines 10-12. Applicants further note that one of ordinary skill would readily recognize that replacing "tetrakis(phenyl)borate" with tetraphenylborate and replacing "tetrakis(phenyl)aluminate" with tetraphenylaluminate also clearly constitute revisions of a typographic or clerical nature to employ correct IUPAC nomenclature. Applicants thank Examiner Lee for suggesting the amendments to Claim 19 and entered the same by Examiner's amendment.

Applicants believe that no fee is due for the filing of this Amendment. However, the Commissioner is hereby authorized to charge any additional fees which may be required, or credit any overpayment to deposit account no. 09-0528.

Respectfully submitted,

David E. Wigley, Ph.D.
